PROFILE

Technical Project Manager and product builder with hands-on IT/AV, enterprise support, Linux/VPS, automation, AI-assisted development and technical communication experience. I combine project, support and operational ownership with a philology-based precision in writing, structuring information and documenting standards. I work well at the intersection of business, users, technical teams and systems: diagnosing issues, driving delivery, supporting operations and building processes that scale responsibility.

Fit for technical and operational roles

01

Delivery and ownership

Project delivery, service coordination, prioritization, client communication and closing topics end to end.

02

Support and IT operations

Ticket diagnosis, enterprise tooling, admin work, procedures and enablement for customer-facing teams.

03

Automation and AI

Self-built products with Linux, Docker, AI APIs, queues, monitoring, documentation and agent workflows.

Selected projects showing technical delivery, automation, infrastructure, AI-assisted development and operational thinking.

Project portfolio

berry-secure

LINUX / NETWORK / SECURITY APPLIANCE

Public installer and WebUI for a home/office Raspberry Pi router: DNS, firewall, WireGuard, storage/Samba, security monitoring and WAN/LAN configuration.

Linux, Raspberry Pi OS Lite, Bash, Python, FastAPI/Uvicorn, BIND, WireGuard, nftables, Samba

preflight and installation automation

network, DNS and firewall troubleshooting

monitoring daemon, alerts and documentation

UniFlowEngine

AI WORKFLOW PLATFORM

Workflow platform for organizations: tickets, projects, knowledge base, inventory, mailboxes and tasks. The AI layer classifies tickets, analyzes emails and uses AI APIs for structured responses.

TypeScript, Next.js, React, Gemini API, Prisma/PostgreSQL, Redis, BullMQ, IMAP, PDF parsing

AI API inside a workflow product

queues, fallbacks and structured output

IMAP -> PDF -> task suggestion pipeline

Project portfolio cont.

Signal Deck

DIGITAL SIGNAGE CMS + PLAYER

Digital signage system with CMS, Android/Android TV player, device pairing, scheduling, proof-of-play, live commands and heartbeats.

React, Vite, Capacitor, Express, Prisma/PostgreSQL, Docker, Android TV

operational panel for device fleets

Docker and deployment model

heartbeat, proof-of-play and failure states

Online portfolio

DOCKER / NGINX / COOLIFY DEPLOYMENT

Static portfolio with CV downloads, deployed as a Docker image through Coolify at portfolio.berry-secure.pl.

HTML, CSS, JavaScript, Docker, nginx, Coolify, GitHub

repository, build and deployment

nginx, caching and security headers

DNS, TLS, responsive and PDF checks

Strengths

- Technical project and operations delivery: schedules, procedures, standards, communication and ownership of outcomes.
- Support development: ticket classification, escalation, documentation, user training and cooperation with technical teams.
- IT systems: Linux, VPS, DNS, HTTP, TCP/IP, administration basics, enterprise tools and remote support.
- Automation and delivery: Bash/Python, Docker, nginx, Coolify, Git, CI/CD and build-test-deploy understanding.
- AI-assisted work: technical prompts, agent workflows, AI API implementation, structured output and response QA.
- Communication: philology background, editing, proofreading, sales and years of technical client-facing work.

Experience

06.2022 - PRESENT

Technical Project Manager

Mood Polska Sp. z o.o.

- Lead IT/AV technical projects for retail, hospitality and restaurant clients, from problem discovery to delivery.
- Design network and AV solutions, coordinate service work, support the office and provide subject-matter support for customer service.
- Organize procedures, instructions, standards and communication between sales, service, clients and technical teams.
- Operational ownership practice: prioritizing tasks, communicating with multiple stakeholders and closing topics.

10.2020 - 05.2022

Technical Customer Support

Ricoh Europe

- Provided technical support for a US client, diagnosing tickets, reporting incidents and guiding users through resolution.
- Worked with admin and remote tools: domain controllers, MS365 Admin, Azure, Kaseya and TeamViewer.
- Classified issues, gathered data, analyzed ticket logic and communicated in a structured enterprise environment.

09.2018 - 09.2020 AND
04.2022 - 05.2022

Technical Support Specialist

Mood Polska Sp. z o.o.

- Serviced software/hardware for music and scent devices, programmed devices and planned interventions across Poland.
- Implemented network solutions, supported large-company help desks, trained end users and escalated issues.
- Created and controlled advertising/update packages for multiple playback platforms.

2005 - 2018

Editorial, sales and entrepreneurship foundation

Kurier Spółdzielczy, P4/Play, T-Mobile Banking Services/Alior, Medical Tribune, Inżynieria Ogrodowa

- Proofreading, editing, photojournalism, content creation and marketing strategy support.
- Sales, customer service, banking and telecom procedures, negotiation and relationship building.
- Ran a company from age 20: garden engineering projects, geosynthetic works for road infrastructure, coordination across multiple locations and a team of 30+ people at peak.

Education, languages, certificates

- University of Warsaw - Polish Philology, studies started.
- Languages: Polish native, English advanced/fluent, French A2.
- Certificates/training: GIIF, KNF, sales techniques, negotiation and voice training.
