PROFILE

Technical Project Manager and product builder working at the intersection of language, support, automation and AI. I design system prompts, response formats, fallback logic, quality criteria and workflows that turn messy inputs from emails, PDFs, tickets and conversations into decisions, tasks, content and usable interfaces. I combine a proofreader's precision with hands-on IT/AV, enterprise support, documentation and self-built product experience.

Why I fit AI roles

01

Prompt architecture

I design system instructions, JSON response contracts, edge cases, fallbacks and language for evaluating model output.

02

Content pipelines

I build workflows from raw input to polished content, tasks, tickets, reports and model-backed recommendations.

03

AI UX and quality

I write interface copy, error states, conversational flows and evaluation rubrics for tone, coherence and usefulness.

Selected GitHub and public web projects mapped to AI, product, prompt, UX and quality roles.

Project portfolio

UniFlowEngine

AI WORKFLOW PLATFORM

Workflow platform for organizations: tickets, projects, knowledge base, inventory, mailboxes and tasks. The AI layer classifies tickets, answers from context, detects action items in emails and enforces structured output.

TypeScript, Next.js, React, Gemini API, Prisma/PostgreSQL, Redis, BullMQ, IMAP, PDF parsing

system prompts and JSON responses

fallback parser when the model or API fails

IMAP -> HTML cleanup -> PDF -> task suggestion pipeline

Signal Deck

DIGITAL SIGNAGE CMS + PLAYER

Digital signage system with a CMS, Android/Android TV player, device pairing, scheduling, proof-of-play, live commands, heartbeats and a multi-tenant model.

React, Vite, Capacitor, Express, Prisma/PostgreSQL, Docker, Android TV

product architecture and operational dashboard

copy, states, onboarding and deployment docs

reporting, device fleet, playlists and permissions

berry-secure

SECURE RASPBERRY PI APPLIANCE

Public installer and WebUI for a home/office Raspberry Pi router: DNS, firewall, WireGuard, storage/Samba, security monitoring and WAN/LAN network configuration.

Linux, Raspberry Pi OS Lite, Bash, Python, FastAPI/Uvicorn, BIND, WireGuard, nftables, Samba

infrastructure product explained in user language

installer, preflight, configuration and docs

security daemon, alerts and firewall rules

Retro Goat Rampage

IOS GAME + RELEASE UX

iOS game prototype with a 30-level campaign, touch controls, power-ups, bosses, marketing page, support page, privacy policy and TestFlight/App Store release preparation.

Swift, SpriteKit, UIKit overlays, GitHub Pages, App Store support/privacy pages

UX writing, support messaging and privacy copy

release readiness and product checklists

consistent brand language and user documentation

Strengths for AI/Product

- Prompt design: system instructions, roles, constraints, style guides and structured outputs.
- AI QA/evaluation: evaluation rubrics, test cases, hallucination checks, tone and completeness.
- UX writing: microcopy, conversations, error states, onboarding and PL/EN documentation.
- Product translation: turning business and user needs into data models, flows and backlog items.
- Technical delivery: Linux, web apps, APIs, integrations, deployment, monitoring and VPS work.

Experience

06.2022 - PRESENT

Technical Project Manager

Mood Polska Sp. z o.o.

- Lead IT/AV technical projects for retail, hospitality and restaurant clients.
- Translate user, service and sales problems into solutions, quotes, schedules, procedures and instructions.
- Design network and AV solutions, modernize tooling, support the office and provide subject-matter support for customer service.
- Handle email, phone and teleconference communication with clients and teams across Europe.

10.2020 - 05.2022

Technical Customer Support

Ricoh Europe

- Provided technical support for a US client, diagnosing issues and reporting incidents.
- Worked with admin and remote tools: domain controllers, MS365 Admin, Azure, Kaseya and TeamViewer.
- Built strong habits around precise questioning, problem classification and guiding users through resolution.

09.2018 - 09.2020 AND
04.2022 - 05.2022

Technical Support Specialist

Mood Polska Sp. z o.o.

- Serviced software/hardware for music and scent devices, programmed devices and planned interventions across Poland.
- Implemented network solutions, supported large-company help desks and trained end users.
- Created and controlled advertising/update packages for multiple playback platforms.

2005 - 2018

Editorial, sales and entrepreneurship foundation

Kurier Spółdzielczy, P4/Play, T-Mobile Banking Services/Alior, Medical Tribune, own business

- Proofreading, photojournalism, editing, traffic-oriented content creation and marketing strategy support.
- Sales, customer service, banking and telecom procedures, negotiation and relationship building.
- Ran a company and coordinated remote construction/landscaping projects with roughly 40 people at peak.

Education, languages, certificates

- University of Warsaw - Polish Philology, studies started.
- Languages: Polish native, English advanced/fluent, French A2.
- Certificates/training: GIIF, KNF, sales techniques, negotiation and voice training.
