UPDATED May 2026

ROLE- FOCUSED PROFILE

Junior DevOps Engineer candidate with experience in technical support, IT/AV projects, enterprise admin tooling and self-built Linux/VPS projects. I work hands-on with Bash/Python, Docker, nginx, DNS, firewall concepts, monitoring and Coolify-based deployments. I naturally use AI-assisted development: precise technical prompts, agent workflows, code/log analysis and solution documentation. I am looking for a role where I can quickly take ownership of environments, automation and system stability.

Fit for Junior DevOps Engineer

01

Linux, networking, troubleshooting

berry-secure shows practical Linux, DNS, WireGuard, nftables, Samba, monitoring and WAN/LAN configuration work.

02

Build, deploy, automation

Portfolio and web projects move through Git, Docker, nginx/Coolify and production checks for links, TLS and PDFs.

03

AI-assisted DevOps

I use LLMs for code generation and analysis, debugging, technical prompts and structured operational output.

Projects mapped directly to the requirements: Linux, Bash/Python, networking, Docker, CI/CD, monitoring and AI-assisted workflows.

Technical portfolio for DevOps

berry-secure

LINUX / NETWORK / SECURITY APPLIANCE

Public installer and WebUI for a home/office Raspberry Pi router: DNS, firewall, WireGuard, storage/Samba, security monitoring and WAN/LAN configuration.

Linux, Raspberry Pi OS Lite, Bash, Python, FastAPI/Uvicorn, BIND, WireGuard, nftables, Samba

preflight and installation automation

network, DNS and firewall troubleshooting

monitoring daemon, alerts and documentation

Online portfolio

DOCKER / NGINX / COOLIFY DEPLOYMENT

Static portfolio with CV downloads, deployed as a Docker image through Coolify at portfolio.berry-secure.pl.

HTML, CSS, JavaScript, Docker, nginx, Coolify, GitHub

repository, build and deployment

nginx, caching and security headers

DNS, TLS, responsive and PDF checks

Project portfolio cont.

UniFlowEngine

AI WORKFLOW PLATFORM

Workflow platform for organizations: tickets, projects, knowledge base, inventory, mailboxes and tasks. The AI layer classifies tickets, analyzes emails and enforces structured output.

TypeScript, Next.js, React, Gemini API, Prisma/PostgreSQL, Redis, BullMQ, IMAP, PDF parsing

queues, fallbacks and structured output

IMAP -> PDF -> task suggestion pipeline

AI-assisted workflow debugging

Signal Deck

DIGITAL SIGNAGE CMS + PLAYER

Digital signage system with CMS, Android/Android TV player, device pairing, scheduling, proof-of-play, live commands and heartbeats.

React, Vite, Capacitor, Express, Prisma/PostgreSQL, Docker, Android TV

operational panel for device fleets

Docker and deployment model

heartbeat, proof-of-play and failure states

Key strengths for this role

- Linux/systems: administration, troubleshooting, service configuration, VPS work and edge-device environments.
- Networking: TCP/IP, DNS, HTTP, WireGuard, firewall/nftables, WAN/LAN and environment-side diagnosis.
- Automation: Bash/Python, installers, preflights, operational documentation and reducing repeatable work.
- CI/CD mindset: Git, Docker, build-test-deploy, Coolify deployments and understanding stable releases.
- Monitoring/quality: application logs, heartbeats, alerts, incidents, acceptance criteria and backend-facing communication.
- Soft skills: independence, initiative, ownership, calm communication and a solution-first approach.

Skills

Linux/net

Linux TCP/IP
DNS HTTP
WireGuard nftables

Scripting

Bash Python
preflight installers
automation
runbooks

CI/CD

Git Docker nginx
Coolify
build-test-deploy
VPS

Monitoring

logs heartbeats
alerts incidents
QA documentation

AI-assisted

Codex LLM prompts
agents debugging
code review
structured output

Experience

06.2022 - PRESENT

Technical Project Manager Mood Polska Sp. z o.o.

- Lead technical IT/AV projects, coordinating deployments, service work and changes in client environments.
- Design and diagnose network and AV solutions; work close to production-like issues and end users.
- Create procedures, instructions, schedules and work standards for technical and customer support teams.
- Cooperate with European teams, clients and service staff; take responsibility for closing topics end to end.

10.2020 - 05.2022

Technical Customer Support Ricoh Europe

- Diagnosed tickets and incidents for a US client in a structured enterprise environment.
- Worked with domain controllers, MS365 Admin, Azure, Kaseya and TeamViewer; gathered data and escalated issues.
- Built habits around precise questioning, documentation, problem classification and blameless communication.

09.2018 - 09.2020 AND
04.2022 - 05.2022

Technical Support Specialist Mood Polska Sp. z o.o.

- Serviced software/hardware devices, programmed devices and planned interventions across Poland.
- Implemented network solutions, supported large-company help desks and trained end users.
- Controlled advertising and update packages for multiple playback platforms, with focus on correctness and timing.

2005 - 2018

Editorial, sales and entrepreneurship foundation Kurier Spoldzielczy, P4/Play, T-Mobile Banking Services/Alior, Medical Tribune, own business

- Proofreading, editing, photojournalism, content creation and marketing strategy support.
- Sales, customer service, banking and telecom procedures, negotiation and relationship building.
- Ran a company and coordinated remote construction/landscaping projects with roughly 40 people at peak.

Education, languages, certificates

- University of Warsaw - Polish Philology, studies started.
- Languages: Polish native, English advanced/fluent, French A2.
- Certificates/training: GIIF, KNF, sales techniques, negotiation and voice training.
